^aAll values expressed as mean ± standard deviation (SD) (N = 4).

^bFinal urine collection includes urine present in the urinary bladder at study termination.

^cTissue weights for the dispersed tissues were calculated using the following percentages of body weight: adipose 7.0%, blood 7.4%, muscle 40.4%, and skin 19% (International Life Sciences Institute, 1994).

^dTBR = Tissue to blood ratio
